

### Remarks

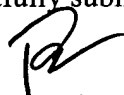

This Amendment is submitted together with a Request for Continued Examination. The amendments set forth above assume entry of the earlier amendments dated April 6, 2005 and received in the Patent Office on April 8, 2005 into the Official File.

The Applicants note the Examiner's helpful comments in the Advisory Action and have made several additional changes to facilitate allowance. First, the Applicants have made minor editorial changes to Claim 3 to improve its readability. Entry into the Official File is respectfully requested.

Claim 6, as previously submitted, contained all of the intended subject matter. However, some of the language was not completely underlined. To avoid confusion, the Applicants have cancelled Claim 6 and simply re-added it as new Claim 12. The language that was previously inadvertently not underlined was the following: "layer is a water-soluble resin or UV-curable resin when the photosensitive resin layer is a hydrophobic resin," which followed the language that was underlined. Also, the Applicants have made one additional editorial change to new Claim 12 over Claim 6 to make it more readable as well.

The Applicants respectfully submit that the entire Application is now in condition for allowance, which is respectfully requested.

Respectfully submitted,

T. Daniel Christenbury  
Reg. No. 31,750
